

## *Contents*

|          |   |     |
|----------|---|-----|
|          | <b>Part I. Observed Regularities</b>  |     |
|          | Introduction  | 3   |
| Chapter  | 1. In Search of an Index  | 33  |
|          | 2. Effects of Mixing Games and<br>Concealing the Matrix   | 50  |
|          | 3. Effects of Interaction   | 56  |
|          | 4. The Contingent Propensities  | 67  |
|          | 5. The Time Courses   | 87  |
|          | <b>Part II. Mathematical Theory</b>   |     |
| Chapter  | 6. General Remarks  | 105 |
|          | 7. Markov Chain Models  | 114 |
|          | 8. Equilibrium Models with Adjustable<br>Parameters   | 129 |
|          | 9. Stochastic Learning Models   | 135 |
|          | 10. Classical Dynamic Models  | 141 |
|          | <b>Part III. Discussion and Projection</b>  |     |
| Chapter  | 11. Testing the Models  | 153 |
|          | 12. Simulation  | 174 |
|          | 13. Comparing Populations   | 185 |
|          | 14. Summary of Results  | 198 |
|          | 15. Concluding Remarks  | 204 |
| Appendix | I. Instructions Given to Subjects Playing<br>Prisoner's Dilemma in the Pure<br>Matrix Condition | 228 |
| Appendix | II. Estimates of Significance (Games<br>Compared)   | 230 |
| Appendix | III. Estimates of Significance (Populations<br>Compared)  | 235 |

|   |     |
|---|-----|
| Appendix iv. Effect of Initial Response | 237 |
| Glossary of Symbols                     | 240 |
| Notes                                   | 248 |
| References                              | 256 |
