| | |
|---|-----|
| Introduction | 1 |
| <i>Euel Elliott and L. Douglas Kiel</i> | |
| Part 1. Chaotic Dynamics in Social Science Data | |
| 1. Exploring Nonlinear Dynamics with a Spreadsheet: A Graphical View of Chaos for Beginners | 19 |
| <i>L. Douglas Kiel and Euel Elliott</i> | |
| 2. Probing the Underlying Structure in Dynamical Systems: An Introduction to Spectral Analysis | 31 |
| <i>Michael McBurnett</i> | |
| 3. Measuring Chaos Using the Lyapunov Exponent | 53 |
| <i>Thad A. Brown</i> | |
| 4. The Prediction Test for Nonlinear Determinism | 67 |
| <i>Ted Jaditz</i> | |
| 5. From Individuals to Groups: The Aggregation of Votes and Chaotic Dynamics | 89 |
| <i>Diana Richards</i> | |
| Part 2. Chaos Theory and Political Science | |
| 6. Nonlinear Politics | 119 |
| <i>Thad A. Brown</i> | |
| 7. The Prediction of Unpredictability: Applications of the New Paradigm of Chaos in Dynamical Systems to the Old Problem of the Stability of a System of Hostile Nations | 139 |
| <i>Alvin M. Saperstein</i> | |
| 8. Complexity in the Evolution of Public Opinion | 165 |
| <i>Michael McBurnett</i> | |
| Part 3. Chaos Theory and Economics | |
| 9. Chaos Theory and Rationality in Economics | 199 |
| <i>J. Barkley Rosser, Jr.</i> | |
